

North West Children & Young People Transformation Programme

1. Training and Events

Reducing Health Inequalities for CYP Workshops

Reducing Health Inequalities for CYP Workshops	
Oral Health	19 th September 10:00-11:00
Young Carers (Improving health outcomes through identification and support of Young Carers in line with the Long Term Plan)	6 th October 10:00-11:00
SEND Autism in schools	7 th November 10:00-11:00
Co-production	TBC December 2022
Emotional Wellbeing; a Local Authority Perspective	12 th January 2023 12:00-13:00
North West Family Hubs Mobilisation	TBC February 2023

Please contact england.nwcyp@nhs.net if you would like to attend any of the above.

Colleagues have recently had issues joining the sessions if they have manually added to their own diaries, so please ensure you have contacted us to book on and receive a diary invite from england.nwcyp@nhs.net

Asthma Workshops

Good Practice Person Centred Plans involving Asthma – 12th October 12:00-13:30
via MS Teams.

This workshop is in response to elements in the Asthma Care Bundle and has been jointly developed with North West Parent Carer Forum.

At this workshop we will discuss:

- Best practice when including Asthma in person centred care plans
- Triggers and prompts
- Feedback from families
- The key differences experienced a range of educational settings
- Guest speakers

Please see attached for more information and contact england.nwcyp@nhs.net to book.

Personal Health Budgets and Social Prescribing Workshop – 11th October 2022

This workshop explores how Personalised Care Models such as Personal Health Budgets and Social Prescribing can improve outcomes and reduce health inequalities for young people. This workshop will share good practice and tips to build Personalised Care into deliverables and budgets for Commissioners and Providers.

Please see attached for more information and contact england.nwcyp@nhs.net to book.

2. Council for Disabled Children National Events

Council for Disabled Children National Events

The next national online event is taking place on 28th September, 10:00 – 13:30.

You can register [here](#).

This online event is aimed at SEND Leads, Commissioners, DSCOs, DMOs and DCOs

– we would also welcome attendance from Parent Carer Forum regional representatives.

Priority will be given to these roles. If you're not in one of these roles but would like to

attend, please email [Adeeba](#) to be added to the waiting list.

The agenda is yet to be announced but the event will consist of a main plenary session

and a range of workshop choices (attendees will be given the chance to sign up to 2x

workshops, details on workshop content and how to sign up will be circulated nearer

the time).

The **main plenary session** will consist of a presentation from the Department for Education about their new SEND contracts and support for CYP, families and professionals going forward, and a presentation from CDC about their offer under the new RISE contract and findings from their workforce survey, plus more to be announced soon!

Please also let us know whether you have any **specific requirements or adjustments**

to be able to attend this virtual event, or which you would like us to be aware of.

Please

mention any needs you might have in the form when you sign up or email me to let us

know if there is anything we can do to support you.

Please also note that we have set the dates for all our national events and webinars until March 2023, so please hold the following dates in your diaries:

- National event 1 - 28th September 2022, 10:00 – 13:30
- National webinar 1 - 9th November 2022, 10:00 – 12:00
- National event 2 - 2nd February 2023, 10:00 – 13:30
- National webinar 2 - 21st March 2023, 10:00 – 12:00

All events and webinars will be recorded. They will be basing a lot of the content of the events and webinars on what comes out of our workforce survey. However, if you have

any ideas or suggestions, or would like to present something yourself, please contact [Adeeba](#).

3. Diabetes

NICE guideline on Diabetes (type 1 and type 2) in children and young people: diagnosis and management – periodontal disease

This final guideline has now been published on the [NICE website](#). You can also find the

[supporting evidence](#), [tools and resources](#) as well as all the [stakeholder comments](#) that

we received during consultation and the responses to these comments. The comments

were invaluable in helping us to develop and refine the guideline. We have also produced an [equality impact assessment](#) to support the guideline.

There is brief information about the guideline for people using services, carers and the public at ['Information for the public'](#).

The final guideline includes [recommendations for research](#). More detail can be found in the [supporting evidence](#). [Funding is available from the National Institute for Health and Care Research \(NIHR\)](#) for projects addressing NICE research recommendations.

We encourage researchers to apply for funding to generate new evidence to inform future NICE guidance.

We would like to thank you for your interest in developing this NICE guideline and any support you can give to promote its use in practice.

If you have any further queries, please contact diabetescyp@nice.org.uk

Impact of youth worker on Diabetes care of young people with Type 1 Diabetes Mellitus

The multi-disciplinary team at Warrington and Halton Teaching Hospitals NHS Foundation Trust developed a project which aimed to demonstrate and evidence the effectiveness of employing a youth worker in their Trust and are sharing the impact of employing a youth worker who supports children and young people with diabetes in their service.

[Impact of youth worker on Diabetes care of young people with Type 1 Diabetes Mellitus](#)

Diabetes transition: A time to act. Article by Dr Satish Hulikere

Transition services for young people with diabetes need to ensure that young people remain fully engaged in their diabetes care. Diabetes transition refers to a time when a young person moves from one diabetes service to another. Transition to adult services from paediatric services is a major milestone for children and young people (CYP) and the transition phase is a critical period. Most adolescents with diabetes are transitioned when they are 16–18 years. The National Diabetes Transition Audit found that about 65% of transitions occur at ages 17 and 18 years old.

4. Asthma

Asthma Care for Children Young Online Training

NHS England have been working with key stakeholders, including young people and their families, to develop a National Bundle of Care for Children and Young People with Asthma to support local systems with the management of asthma care. The programme sets out the blueprint of evidence-based interventions to help children, young people, families, and carers, to control and reduce the risk of asthma attacks and to prevent avoidable harm. The bundle outlines key standards in the care of CYP

with asthma throughout every stage of the patient pathway.

The framework divides different roles into 5 'tiers'. A tier describes the level of care a person may be expected to deliver to a child or young person with asthma. The more involved the care, the higher the level of tier.

The tiers are not profession specific, but rather describe the minimum required knowledge and skills any individual must possess to safely carry out their role in caring for a child or young person with asthma. Individuals should look at their own role and choose the tier most appropriate to the care they deliver.

Free online training has been newly created and available: <https://www.e-lfh.org.uk/programmes/children-and-young-peoples-asthma/>

Asthma Survey for Parents and Carers

NHS transformation programme is starting work to look at implementing Diagnostic Hubs for asthma.

This consultation has been developed with parents and carers, and clinical teams within the NHS and has been designed to understand lived experience of the diagnostic pathway, communication and support received for asthma in children and young people aged 0-25.

Parent/Carer feedback is really important and will help shape and design the development of this work. Please share this survey.

5. Obesity, deprivation and Covid-19

Obesity, deprivation and Covid-19: why rowing back on the obesity strategy could prove to be a costly error

In June 2020, the government began its 'war on obesity' with the publication of its

[obesity strategy](#), spurred into action by data linking obesity with increased risk of severe disease from Covid-19. However, despite the strategy, our analysis of [new data](#) showed that in 2020 (the first year of the Covid-19 pandemic) obesity rates climbed across England and inequalities in obesity prevalence between the least- and most-deprived areas widened.

What is more, the government has rowed back on a range of measures announced in the obesity strategy. This included cancelling the [local authority adult weight management services grant](#), despite the fact that, at £30 million, the grant was equivalent to less than 1 per cent of the [total health budget](#) and was delivering effective interventions, including advice and practical support to help people lose weight, across England.

6. Nuffield Foundation Research, Development & Analysis Fund

Nuffield Foundation Research, Development and Analysis fund is for projects to inform the design and operation of social policy and practice across our three core domains of Education, Welfare and Justice.

Nuffield Foundation have a two-stage application process. Applicants submit a short outline application, and those that meet the criteria are invited to submit a full application, which is subject to independent peer review and considered by Trustees. They support short-listed applicants in refining their proposed projects, to help maximise their rigour and potential impact.

Applications for grants under £750,000 are considered twice a year, with deadlines for outline applications in March and September.

Nuffield Foundation also welcome applications between £750,000 and £3 million for more strategic projects that take an interdisciplinary approach to addressing the most significant themes and developments that will shape the UK public policy and agenda and wider society over the next decade and beyond. They will consider applications for grants of this scale and scope once a year, with a deadline for outline applications in March. Funding for these projects replaces that available through their Strategic Fund,

8. National Child Measurement Programme (NCMP) Update

Which ran from 2019-2021.

Their funding approach is set out in our [strategy](#). To see full funding priorities and application criteria, please read the [Guide for applicants](#).

Before submitting an outline application, you must check that the [Terms and conditions](#) are acceptable, both to you and your host institution.

Next outline application deadline: 12th September 2022.

For more information: [Research, Development & Analysis Fund | Nuffield Foundation](#)

7. Palliative and End of Life Care Statutory Guidance

Palliative and End of Life Care Statutory Guidance for Integrated Care Boards

Integrated Care Systems (ICSs) have a key role to play in ensuring that people with palliative and end of life care (PEoLC) needs can access and receive high quality personalised care and support and there is a duty for ICBs to commission palliative care services within ICSs - this guidance has been developed by NHS England to support that duty. The guidance is statutory and ICBs must have regard to it. It also contains links to resources and good practice for ICSs when planning locally and working collaboratively with local partners.

In addition to ICBs, this guidance will also be of relevance and interest to: patients, carers and the public; NHS providers, commissioners and professionals within health and social care services; local authorities; and voluntary, community and social enterprise (VCSE) organisations.

Technical guidance and resources will be published by September 2022 that will supplement this. Elements of this guidance may be made available sooner.

[B1673-Palliative-and-End-of-Life-Care-Statutory-Guidance-for-Integrated-Care-Boards-20-July-2022.pdf](#)

National Child Measurement Programme (NCMP)

The latest provisional figures for the National Child Measurement Programme (NCMP), from the 2021/22 school year, were published by NHS Digital earlier this week.

The report is available online here: [National Child Measurement Programme, England, Provisional 2021/22 School Year Outputs - NHS Digital.](#)

The provisional 2021/22 NCMP data show decreases in child obesity prevalence in 2021/22 compared to 2020/21. However, prevalence remains higher than any year prior to the pandemic (2006/07 to 2019/20).

This provisional data indicates that following the dramatic increase in childhood obesity and severe obesity prevalence in 2020/21 rates have decreased compared to last year but remain higher than pre-pandemic levels in 2019/20. NHS Digital and OHID are confident that the provisional national estimates of prevalence for each weight category are robust making them comparable to previous years. Some caution should still be exercised as the provisional 2021/22 data only covers data collected and submitted between September 2021 and May 2022, however we expect the final figures for the full data collection to be very similar to these provisional estimates.

The key findings from the report are set out in the document attached.

9. SEND

SEND Review Consultation

Will Quince, the Minister of State for School Standards, has recorded a message about the end of the consultation and next steps. To watch the video in full: [Will Quince MP on Twitter: "Today we're closing our #SENDReview consultation](#)

10. Funding opportunity from the GreenerNHS team

Healthier Futures Action Fund now open: Small steps add up

A new [Healthier Futures Action Fund](#) from the Greener NHS is now open for applications. The fund aims to support individuals and teams within NHS organisations to kick-start innovative initiatives or ideas that will improve health and patient care, reduce inequalities, and deliver value, while supporting a more sustainable health

service.

From reducing waste in all its forms to the introduction of sustainable technologies, from new clinical pathways to active travel and cleaner air initiatives, the Healthier Futures Action Fund aims to support you to develop and roll-out a diverse range of health and care improvement projects, processes, products or pathways.

The fund is now open to individuals and teams within the NHS, clinical and non-clinical, for bids with a suggested range of between £3,000-£15,000.

Small steps add up. [Find out more & apply for the Healthier Futures Action Fund today](#),

to kick-start your sustainable healthcare initiative for better health now and for future generations. Applications are open from 6 July – 19 August 2022.

If you would like to learn more, the GreenerNHS team is hosting a webinar: Healthier Futures Action Fund – your questions answered on **Thursday 4th August 2022, 1:00-1:50pm**. This webinar will explain more about the GreenerNHS' Healthier Futures

Action Fund, answer questions from possible applicants and give an overview of the process involved. You can [sign up here for the webinar](#).
